Election/Restrictions

Applicant's election without traverse of Group 2, claims 3,5,41 in Paper No. 6 is acknowledged.

Claims 1,2,4,6-40,42-49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3,5,41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is indefinite. The preamble of the claim is directed to a "device for performing intravascular procedures" yet body of the claim is devoid of the structures which make up the device. The body of the claim includes a valve means and a filter. It is not clear how the valve means is associated with the function for performing intravascular procedures. The recitation of "intravascular portion" should be in the body of the claim.

Claim 5, the recitation of "intravascular portion" should be in the body of the claim. Line 6, recitation of "said flowpath spanning portion" does not have antecedent support. This recitation refers to the filter and not the valve assembly.

Claim 41, see rejection to claim 3 supra.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3,5 and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Khosravi, et al (6371970) or Barbut, et al (6309399) in view of Garrison (WO 00/47139).

The claims as broadly worded do not preclude that the device be a single device. Examiner is broadly interpreting the claims to be readable on two separate devices for performing the procedure as claimed. Either of Khosravi, et al or Barbut discloses the filter as claimed. Garrison discloses the devices for implanting cardiac valves. Note, Khosravi, et al, column 6, lines 50+, utilizes the filter when emboli is generated by interventional instruments used in cardiac surgery. The use of the heart valve in combination with the filter would have been obvious to one with ordinary skill in the art based upon surgical considerations.
